

Rhode Island Heat Pump Access Program

You could save thousands of dollars on a brand new heating and cooling system.

Heat, cool, save

We're Rewiring America, a nonprofit on a mission to electrify homes across the USA and help Americans save money on energy. We've partnered with global manufacturers and local contractors to offer Rhode Island homeowners brand new heat pumps at a **20-30% reduced cost** compared to standard market pricing. To ensure you have a quality installation experience, we're also offering:

Connection to trusted contractors

Selecting a contractor can be stressful. Our installation partners **GEM Plumbing and Heating** have offered world-class customer service for more than 75 years.

End-to-end project support

From the first phone call through to installation day, Clean Heat Rhode Island administrator **Abode Energy's** heat pump experts are in your corner.

Maximize savings

On top of our 20-30% cost reduction, we want to help you qualify for and access all available incentives (including **up to \$11,500** off if you qualify for the relaunched Clean Heat Rhode Island rebate program).

Financing

We can connect you to mission-driven lending partners, such as **Capital Good Fund**, for low- or no-interest financing options.

Do you qualify?

This program is for you if you're:

A homeowner — or renter with landlord approval — living in a single-family home or a 2-4 unit building that is owner-occupied.

A household earning up to 150% of state median income. (Note that households of any income can still reach out for project assistance.) Visit our website homes.rewiringamerica.org/ri to learn more.

Get started

Scan the QR code to book a consultation with an energy expert at Abode who will (virtually) meet you where you are in your decision-making process.

What is a heat pump?

A **heat pump** is a single appliance that can provide heating and cooling for your home. They use **2-3 times less energy** than other heating and cooling systems like gas furnaces, propane and baseboard heaters, and traditional A/C systems.

Why get a heat pump?

Comfort

Consistent heating and cooling year round

Efficiency

Less energy needed to get greater comfort

Health and safety

Heats and cools without pollutants and allergens

Example program scenario*

HOUSEHOLD DETAILS

Home size	3 bd, 2 ba, 1,500 sq ft
Heat pump size	3 ton
Household size	3 people
Annual household income	\$120,000
